DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on October 7, 2005 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. **Claims 1-26** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding **claims 1, 7, 16, and 24**, all of the newly added limitations constitute subject matter which was not described in the original specification. For example, particularly:

- “building a composite context model of all the physical devices by examining current location information of each physical device, other persons, places and objects located proximate to each physical device, and current, past, and present behavioral information of the user with each physical device”, and

Art Unit: 2687

- “training the computer system based on the composite context model to dynamically select”.

The limitation “training the computer system” is not even mentioned on the original disclosure. Applicant has not pointed out where in the original disclosure support can be found for the newly added limitations.

Regarding **claims 2-6, 8-15, 17-23, and 25-26**, being dependent from *claims 1, 7, 16, and 24* include same issues explained above. Therefore, they are rejected for the same reasons explained above.

Response to Arguments

4. Applicant's arguments with respect to all claims have been considered but are moot in view of the new ground(s) of rejection.
